

Mission-Critical IT Systems Support

Sine Nomine Associates provides 24x7 support for an extensive range of platforms and applications, such as the Debian Linux distribution on multiple platforms, z/VM, AFS and OpenAFS. Our experts support the IT infrastructure of many of the largest organizations in the world.

IBM eServer Systems

Sine Nomine Associates experts have extensive (15+ years) experience in system design, operations and maintenance with IBM eServer equipment and peripherals, including the latest processors, ESS and integrated peripherals.

- System/390
- zSeries
- PSeries
- Xseries
- **z990**

Mainframe Operating Systems

- 25 years experience with VM/CMS systems (average engineering experience with VM: 15 years)
- 30 years OS/390 and z/OS system management and systems programming experience
- 18 years VMS experience on VAX and Alpha systems
- 15 years experience with VSE

Andrew File System

Sine Nomine Associates engineers include current maintainers of the OpenAFS Project. Sine Nomine Associates is the only commercial entity providing support for Transarc and OpenAFS in enterprise deployments.

- 15+ years development experience on enterprise Unix and Linux systems
- Significant contributions to the OpenAFS project, and major improvements for OpenAFS on Windows

Enterprise Unix Systems

- Sun Enterprise Technology Certification, with 15 years Solaris and SunOS system management and configuration experience
- 15 years AIX system management and configuration experience (PowerPC and AIX/390)
- 15 years Digital Unix and Tru64 system support experience

Tivoli Systems Management

Sine Nomine Associates engineers have designed, developed, implemented, supported, assessed and upgraded a broad range of IT systems management architectures based on the Tivoli family of systems management tools.

- Tivoli Management Framework
- Tivoli Enterprise Console
- Tivoli Monitoring
- Tivoli Access Manager
- Tivoli Identity Manager
- Tivoli Configuration Manager
- Tivoli Storage Manager
- Tivoli Workload Scheduler
- Tivoli Performance Manager
- Tivoli NetView

(more on reverse)

Legacy and Brand X Plug-Compatible Systems

Sine Nomine Associates engineers have extensive familiarity with design and deployment of Hitachi, Fujitsu, National Semiconductor and Amdahl IBM plug-compatible systems and peripherals

- 7+ years Hitachi experience
- 6 years Fujitsu experience
- 12+ years Amdahl experience
- Sine Nomine Associates is a Development and Testing Partner with StorageTek for advanced hardware and disk management solutions

Debian Linux Distribution for System/390

Sine Nomine Associates commercially supports the Debian Linux distribution for System/390 and zSeries.

- Installation
- Defect resolution
- Support
- Custom development

Websphere

We have participated actively in a wide range of projects utilizing Websphere Application Server, MQ Series, Portal, and other components.

Nagios

Sine Nomine Associates supports Nagios, an Open Source monitoring toolkit, as a monitoring solution for customers, in deployments ranging from a few dozen hosts to several thousand, with both active and passive service and network availability monitoring.
